

Model 6511 Electronic Control Base

From the North Atlantic to the South Pacific, Kobelt interior and exterior control heads are known worldwide for their craftsmanship and durability. All our electronic controls are constructed from bronze and stainless steel and are available in both twin and single engine configurations. And whether you prefer black epoxy, chrome or polished bronze, we've got a housing finish to suit any wheelhouse décor. For those with a taste for the opulent, we can even have them gold-plated!
Shown above with model **6555** control head.

If you need a control head to handle various functions such as trolling modes and overriding throttle, just give us the details and we can custom build one to suit your needs.

The 6511 control base works with the following control heads:

6515
6523
6545
6555

Order Options:

B = Black Epoxy
