

Model 7037 Sterndrive Steering Cylinder

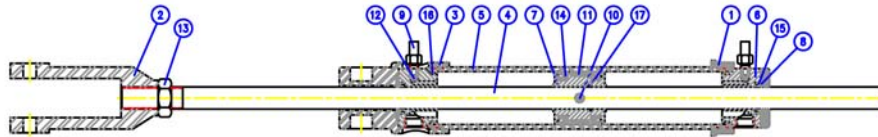

This cylinder is designed for the Mercruiser and Volvo sterndrives which incorporate the use of two pins to hold the cylinder in place. The cylinder has a 1 1/2" I.D. and a 6 1/2" stroke. It is constructed of corrosion resistant bronze, brass and stainless steel and will give you many years of dependable service. This cylinder will far outlast the competition and individual parts are available for future maintenance.

The bottom image shows the detail of the bore where the pin would secure the cylinder. Since Mercruiser and Volvo use different size pins, this bore can be sleeved to accept the smaller pin size. Please let us know which sterndrive you would be outfitting with this cylinder so that we can provide you the sleeves should you require them.

Dimensions and Parts

All dimensions are in inches (mm)

ITEM	QUANTITY	PART #	DESCRIPTION
1	1	7037-0001	End Cap
