

Mechanical Controls

Kobelt Manufacturing provides a complete line of mechanical controls, all in die-cast bronze and stainless steel construction including push/pull and wire-over-pulley systems for single- and multi-station applications.

Pneumatic Controls

Kobelt pneumatic controls are the finest in the industry. We manufacture components for any type of pneumatic control system — fixed pitch, CP propellor, deck machinery and any interface providing time delays and interlocks.

Disc Brakes

Kobelt Manufacturing is world-renowned when it comes to heavy duty disc brake applications. Our vast variety of components and flexibility in design enables us to look after almost any disc brake application from torques of 100 kg meter to 300,000 kg meter.

QUALITY MATERIALS

Many of our products have been in operation for over 25 years. To ensure decades of corrosion-free use, all Kobelt products are constructed of bronze and stainless steel wherever possible. This is Kobelt's assurance to you that our products are built for durability and long life...NOW THAT'S VALUE!

FLEXIBLE PRODUCT OPTIONS

Kobelt products are available in a vast array of styles to suit any application or setting. Our wide variety of colours and finishes allows you to choose the option that best fits your vessel.

"I've had these controls for 19 years,
and they just won't break."

— EDDIE DUTKO
